devio

Software your business runs on.

برمجيات يعتمد عليها عملك.

Websites · Mobile apps · Business software · Design

United Arab Emirates

Built to be relied on.

Who we are

A software studio that designs, builds and launches websites, apps and business systems for companies in the UAE.

What the logo says

The name, drawn from one line with square, engineered corners. The square dot on the i is the single point of colour: the one thing done precisely.

How we sound

Plain, calm and exact. We talk about what a customer gets, in Arabic and English, and never hide behind technical words.

The logo is the name

There is no separate symbol. Use the wordmark wherever there is room; the icon is only for app icons, favicons and profile pictures.

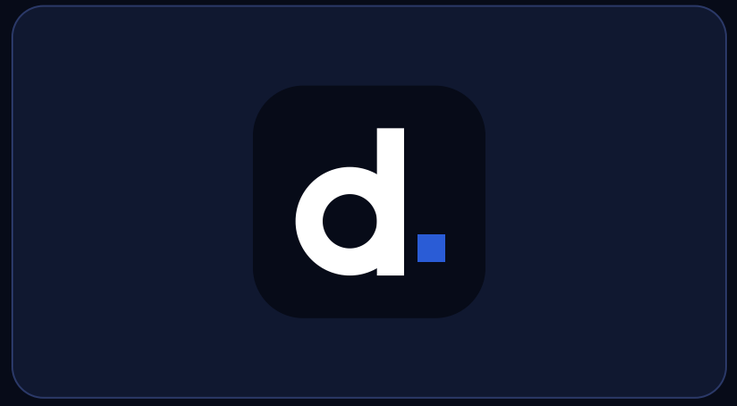

Main, on navy · devio-logo-reversed.svg

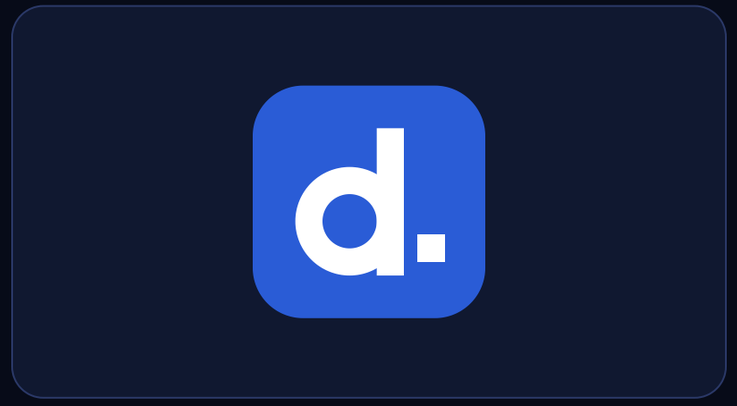

On light · devio-logo.svg

One colour · devio-logo-mono-white.svg

Icon · devio-icon.svg

Icon on royal · devio-icon-royal.svg

Icon on light · devio-icon-light.svg

Clear space and size

Keep a space equal to the height of the letter o free on every side. Nothing else enters it.

- Wordmark: at least 72 px wide on screen, 20 mm in print.
- Icon: at least 24 px on screen, 8 mm in print.
- The wordmark stays in Latin letters in Arabic layouts and keeps its left-to-right order.
- On photos, place the logo on a navy panel.

Please don't

Stretch or squeeze it

Change the colours

Rotate or tilt it

Put the royal dot on royal

Add glows or effects

Use it on low contrast

Fade it

Retype it in a font

Deep navy and one royal blue

Royal is the only accent. It marks the one thing to look at or press. Roughly 70% navy, 20% white and mist text, 10% royal.

Navy
#070B18
RGB 7 11 24

Royal
#2A5CD6
RGB 42 92 214

Surface
#101830

Royal light
#7B9EEE

Mist
#96A2C2

Cloud
#F3F5FA

- Text on royal is always white.
- Small blue text and icons on navy use Royal light so they stay readable.
- Lines are #1C2748 and #2B3968. No neon, no glows, no second accent.

How Devio speaks

Say what the customer gets

"A website that turns visitors into enquiries."

Not: "A responsive, SEO-optimised web solution."

Short, concrete, sentence case

One idea per sentence. No exclamation marks, no buzzwords, no promises we cannot prove.

Tagline

Software your business runs on.

قل للعميل ماذا سيحصل عليه

«موقع يحوّل الزوّار إلى عملاء يتواصلون معك.»

وليس: «حل ويب متجاوب ومتوافق مع محركات البحث.»

عربية واضحة وبسيطة

فصحى مبسّطة يفهمها الجميع في الإمارات. جملة قصيرة وفكرة واحدة، بلا مبالغة.

الشعار اللفظي

برمجيات يعتمد عليها عملك.

Shape, light and motion

Shape

Panels with 18 px corners and a 1 px line. Buttons and tags are full pills. Line icons with a 1.6 px stroke. The square dot can mark a bullet or the current item.

Light

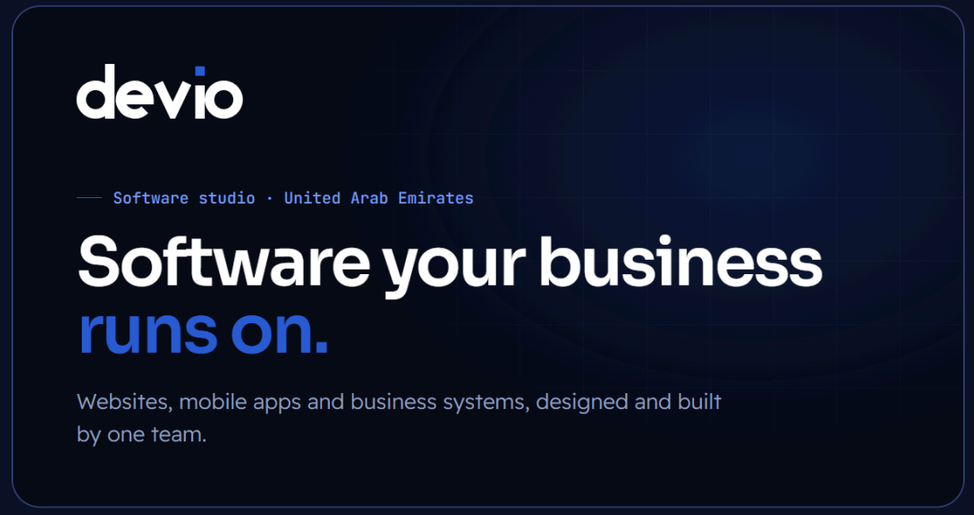

Backgrounds stay flat navy. One soft wash of royal and a faint 80 px drafting grid may sit behind the main image of a page, and nowhere else.

Motion

Cinematic but calm: headlines rise word by word, the logo draws itself, product screens tip into place and sentences light up as you scroll.

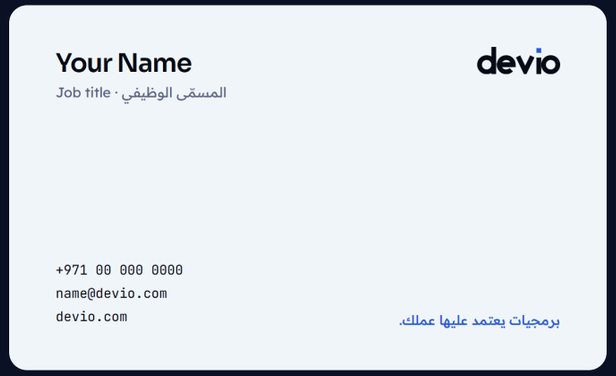

```
Ease cubic-bezier(.22, 1, .36, 1)
180 ms taps · 450 ms moves · 1000 ms reveals
Move and fade only · respect reduced motion
```
